

RONK

Fused Disconnect Double-Throw Switch

7426
400 Amp

Ronk Solid Performance for quick-break safety and quick-make backup

- Rainproof NEMA 3R all-aluminum enclosure
- Single set of Class “T” fuses included
- Non-jamming action
- Neutral bar comes standard

**Reliability. Simplicity.
Economy. Safety.**

Now you get it all in one box...
at a lower cost

The new Ronk Fused Disconnect Double-Throw Switch lets you save money – a lot of it – without giving up any of the features you need. This switch is specially designed to meet your exact requirements. No longer are you forced to buy a three-phase switch when you have only single-phase power.

This industry-first product puts everything you need in one box: “Made in the USA” Ronk reliability, simplicity, economy, and safety, all packaged in an all-aluminum, rain-proof NEMA 3R enclosure.

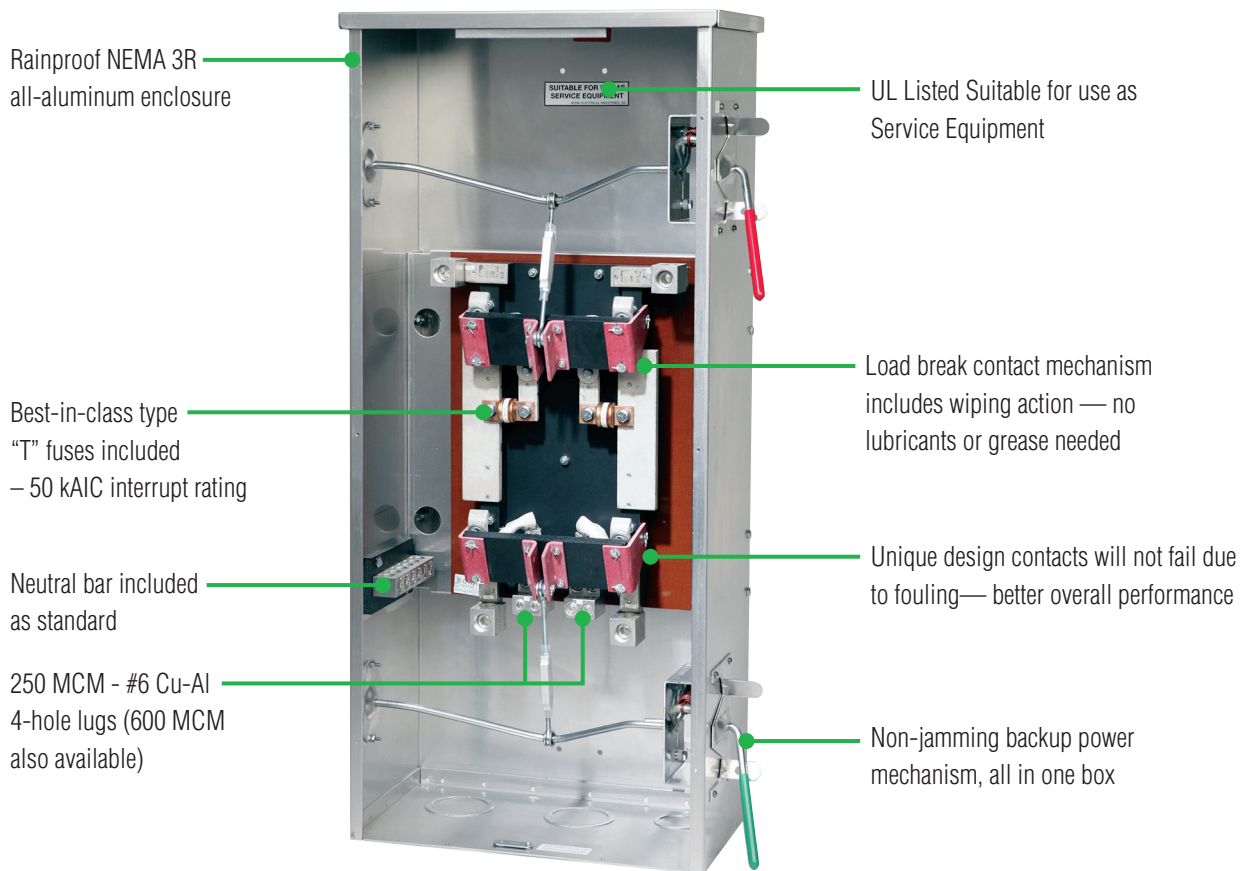

Best of all, its unique design load-break contact mechanism will not fail due to fouling, is non-jamming, includes a neutral bar and uses best-in-class type “T” fusing. Let us demonstrate how you can increase efficiency, stabilize power usage, and walk away at night knowing that all systems can operate reliably.

Ronk Electrical products and replacement parts are available through
a network of distributors throughout the U.S.
