## WP15PTOS PTO Generator

**Now with a Frequency (Hz) Meter!**

The Redesigned WP15PTOS 15KW generator now offers a voltage regulated 120/240 volt output with a continuous current of 62.5 amps at 240 volts and 125 amps at 120 volts. With voltage regulated power the output voltage remains constant regardless of the load placed on the generator ensuring your equipment is supplied the appropriate voltage. A frequency meter installed on this generator assures the proper frequency is maintained.

The power produced from this 3600 rpm tractor-driven generator will start an 8HP code G motor or a combination of motors up to that limit, providing a reliable means to keep your equipment running in the event of a power outage.

The receptacle package built into the WP15PTOS consists of a NEMA 5-20R 120 volt, 20 amp duplex outlet and a NEMA 14-60R 120/240 volt, 60 amp receptacle giving this generator the versatility to be used as temporary standby power or as a power supply in a remote area of pasture or anyplace power is required. The generator is shipped with the plug kit necessary to route power from the generator's 60 amp output.

**Options available:**  
Three Point Hitch Kit with PTO shaft  
Tumbling bar  
Trailer kit

### Standard Features:

- Frequency Meter
- Mainline Circuit Breakers
- Voltage Regulated Output
- Full power receptacle and matching plug provided on unit
- Safety Shield
- Lifting Eye
- Helical Gears
- Gear Lubricant
- Grounding Lug
- 100% Copper Windings
- Protective Rodent Screen
- Mounting Base

New WP15PTOS	
<b>Specifications</b>	
Power Rating (Watts)	15 KW
A C Output Voltage	120/240 volts
Amps (Continuous)	60 amps
Generator Speed (RPM)	3600
Phase	1
<b>Receptacles</b>	
Yes	
NEMA 5-20R 120V Duplex	1-20 amp
NEMA 14-60R 120/240V	1-60 amp
Tractor HP Required	30
PTO Input Speed (RPM)	540
Code G Motor Starting	8
Dimensions (LxWxH)	33X19X20.2
Shipping Weight (lbs)	255
Warranty	1 year

Winpower developed our first PTO generator nearly sixty-five years ago. When a Winpower generator is purchased you are obtaining a product that is durable, reliable, tested, and backed by a company that has been in the generator business for eighty years. Winpower's product line of PTO generators is complete with single-phase PTO generators ranging in output from 7 KW to 150 KW, and three-phase generators from 40 KW - 145 KW.

On PTO generators, the cost per KW of output is reduced by 2 to 3 times over portable and packaged standby generators because a substantial portion of a generators cost is the engine or prime mover. Because you already have invested in the tractor you will be utilizing its investment wisely with reduced the cost of a generator purchase.

Note that properly sized PTO generators produce one (1) kilowatt of power for every 2HP of PTO Horsepower.
